

Business Model Canvas

8. Key Partners

- Google Cloud (Gemini, Speech, Maps, Firebase)
- Religious content advisors; licensed Quran sources
- Nutrition advisor
- Elderly-care charities in KSA
- App stores

7. Key Activities

- Improving dialect intent prompts
- Content curation with advisor review
- App iteration in FlutterFlow
- PDPL compliance

6. Key Resources

- Google speech + Gemini services
- Saudi-dialect example library
- Firebase infrastructure
- Trust of elderly users

2. Value Propositions

- One voice companion in the user's own Saudi dialect — no typing, no menus
- Never miss medication or prayer (reminders work offline)
- Islamic needs built in: prayer, Quran, halal-aware diet tips
- Independence for the elder; peace of mind for the family

4. Customer Relationships

- Voice self-service that feels human
- Caregiver co-management
- Family onboarding videos
- Feedback by voice

3. Channels

- Google Play & App Store
- Family word-of-mouth / WhatsApp
- Elderly-care charities & health centers
- Social media aimed at adult children

1. Customer Segments

- **Primary:** elderly people in Saudi Arabia (60+), limited tech experience
- **Secondary:** adult children / caregivers who set up and monitor
- **Future:** care providers & insurers

9. Cost Structure

- Pay-per-use Google APIs (STT/TTS/Gemini/Maps) · Firebase hosting
- FlutterFlow/Replit subscriptions · content licensing · small team · low fixed cost by design

5. Revenue Streams

- Freemium: core reminders & prayer free; premium family plan (caregiver dashboard) by subscription
- Potential B2B/B2G licensing to care providers — no advertising — trust is the product
